MEMORANDUM FOR: Deputy Director for Science and Technology

SUBJECT: Establishment of Controlled Access to  
Projects [REDACTED]

25X1A

25X1A

25X1A

1. The R&D on the subject projects has progressed sufficiently to indicate the technical feasibility of the [REDACTED] program and the [REDACTED] program. It is projected that the follow-on emphasis will be shifted to the development of prototype operational systems.

2. The nature of this subsequent phase of the work is becoming increasingly more sensitive, particularly from the standpoint of the operational components who will utilize the developed systems. It is now deemed advisable to place the projects and information relating to the projects on a limited and controlled access basis.

3. It is therefore requested that the implementation of the above be approved.
